INSTALLATION

1. Make sure the surface be smooth, flat, dry and clean.
2. Plan your design. Measure and mark vertically and horizontally the area of installation.
3. Start working from the middle of the wall to both sides.
4. Apply the heavy duty construction adhesive on wall and panels, follow the instructions indicated on the glue packaging.
5. Press the panel to ensure all its corners and edges adjoin the surface, avoid strong pressure on the relief parts.
6. Fill the gaps with paintable caulking
7. Brush or spray the wall by seal primer and water based Paint.

Tools:

Tape Measuring, Gradienter, wallpaper knife, brush, glue, paint, paintable caulking.
